### **Industry Design Data of China Integrated into DesignView**

On 14 September 2015, the industry design data of China were integrated into DesignView - a design search tool which is developed and maintained by the Office for Harmonization in the Internal Market of the European Union (OHIM). Through DesignView industry design data of China can be searched by the general public.

On the same day, in addition to the State Intellectual Property Office (SIPO) of China, the Canadian Intellectual Property Office (CIPO) and the United States Patent and

Trademark Office (USPTO) make their industry design data available to the DesignView as well.

### **Increasing Requests for Design Patent Evaluation**

The system of design patent evaluation report was added to the Patent Law of China in the third Amendment of Patent Law, and enforced from Oct. 1st, 2009. As a supplementary to design patent preliminary examination system, patentee or interested party can request for a design patent evaluation report and submit it in legal proceedings or for the protection in e-commerce and at the customs.

The number of issued evaluation report increased from 33 in 2010 to 4,052 in 2014, and the number of which in 2015 reached to 3,311 by Aug. 15th, up 53% from last year.

According to SIPO's Officials the product types for which they receive most patent evaluation requests are mainly in fields that are close to people's daily lives, such as furniture, home decoration, lighting, packaging, communications and transportation equipment.
